BIZERBA

PC scales X-Class II Pro
The compact all-rounders

More digital performance

With the X-Class II Pro series you are prepared for the modern daily routine in retail. You can look forward to high-end PC scales with a powerful Intel® Quad Core processor. Enjoy the benefits of more performance and functions which save you time and costs.

Functions to simplify your processes and modular hardware and software which allow you to remain flexible. This is what the X-Class II Pro models stand for. Implement new features and requirements with the large RAM. Example advertising: The enhanced graphic representation shows contents in a high image quality on the customer display. Image files and advertising contents can be centrally loaded via the back office. This is one of many possibilities our network-capable solutions have to offer.

Within the X-Class II Pro series you will find the right model for any use. And you remain open for new tasks. This is ensured, among other things, by the compact design with integrated 3-in-1 printer, numerous options and a software architecture which adapts to your needs. Discover intelligent functions such as our unique automatic tilt compensation. Such functions provide easy handling and help you to save resources.

XC II 800 Pro

This digital and compact counter scale provides you with functions for a modern fresh food counter. With a space-saving design and a powerful Intel® Quad Core processor. You benefit from more performance due to a large RAM. Sufficient memory to let you implement new features or individual requirements.

In addition to the powerful and open PC platform the XC II 800 Pro impresses in terms of its flexibility. Combine hardware and software. The scale simply adapts to your needs. Provided with a cash register drawer the XC II 800 Pro becomes an efficient checkout solution. Use this high-end PC scale in the self-service area, for price labeling or pre-packaging of your products.

Communicate information, advertising contents and cross selling campaigns via a brilliant customer display. Whether you want to advise customers or exactly weigh products: The network-capable solution will make your daily retail routine more efficient. Simply integrated in your IT and device landscape you save time and costs with the XC II 800 Pro. Also thanks to clever functions such as PaperNearEnd or the unique 3-in-1 printer: With just one device you print receipts, labels or linerless paper.

Flexible use

+ Display variants for operator and customer display
+ Combinable with cash register drawer*
+ Open and modular software architecture

Easy handling

+ Intuitive operator prompting: Large touchscreen and individual GUI design
+ Easy and fast cleaning
+ Optimal hygiene: Fanless housing avoids exhaust air and dust in the service counter

Easy Level*

+ Tilt compensation: Automatic tilt recognition of the scale
+ Automatic weight value correction: Improved accuracy
+ Prevents revenue losses
+ Smooth operating procedures

Energy efficiency

+ Fanless housing
+ Wake on LAN function
+ Economical components: SSD, LED backlighting

Inner values

+ Large RAM: Ideally suitable for new features and requirements
+ Current Windows or Linux operating systems: 64 bit
+ SuperSpeed interfaces: 2 x USB 3.0
+ Open for 3rd-party software via RetailIntegratorsKit* (RIK)

3-in-1 printer

+ Receipt, label or linerless mode
+ RetailApp PaperNearEnd*: avoids labels from running out in self-service operation
+ Easy Load: Easy paper roll change

* optional

Optimized processes

Modular system
The X-Class II Pro series gives you flexibility: Select a display variant that suits your needs and place of installation. Whether on the operator display or customer display. All models as a self-service variant come without a customer display. Combine your PC scale with a cash register drawer. This becomes an efficient and space-saving checkout solution. For an ergonomic operating height simply place the cash register drawer below the XC II 800 Pro with short column. Remain independent in terms of software: We offer you an open and modular architecture which covers all retail tasks—from the device software on the device up to the management software in the back office.

3-in-1 printer
A compact printer with receipt, label or linerless mode. Yet another economic advantage the X-Class II Pro series has to offer. The optional adaptive parts allow a quick conversion of the 3-in-1 printer. You are prepared for any use and benefit from functions which save you time and costs: intuitive and smooth paper roll changes with Easy Load. RetailApp PaperNearEnd informs you via e-mail, for example, when the roll is almost empty. You avoid downtimes and can continue working. Perfectly suitable for your self-service area. Matching this printer versatility we also offer you a broad spectrum of labels.

Easy handling
Enjoy efficient working with digital convenience. The customizable GUI intuitively prompts you on a large touchscreen through the user interface. Offer your customers transparency and added values, e.g. with digital information and promotional offers. The Easy Clean design intensifies a positive shopping experience: The frameless integrated displays can be cleaned fast and easily. Remove stray labels and stubborn residues with ease from dirt-repellent surfaces. The result: A hygienic, trust-building appearance which you obtain with our cleaning and care products in the long term.

Avoid revenue losses
Our tilt compensation Easy Level automatically detects the inclination of your PC scale. It digitally determines the correct product weight and avoids revenue losses—always by taking into account legal framework conditions for the use. The tilt sensor ensures improved weight value accuracy at an angled scale position of up to 4°. This is ideal when scale feet are accidentally misaligned during cleaning or the scale is intended for mobile use, e.g. on market stalls having a changing ground. The simplified scale alignment lets you gain valuable time and avoid revenue losses.

Saving energy
Our intelligent PC scales lower your electricity costs. All models work fanless. The exhaust heat is simply dissipated via the housing. A second positive effect: Dusty, warm air is not blown into the counter. Your products stay fresh for longer and the fresh area stays cleaner for longer. Unhygienic, soiled ventilation slots are a thing of the past. Also energy-saving components such as SSD, LED backlighting and the Wake on LAN function all help to optimize energy efficiency: Remote, automatic shut-down of your scale after updates or at the end of the day and booting before opening time.
Inner values
Digitalize your daily routine in retail with the X-Class II Pro series. With the large RAM you implement new features or individual requirements in an efficient way. Irrespective of whether you use the current Windows or Linux 64 bit operating system. As stipulated by the German GoBD, fulfill the principles of proper management and retention of books, records and documents in electronic form as well as for data access with your digital bookkeeping. Back up and transfer receipt data via SuperSpeed interface to an USB stick. Quickly create a backup. An additional advantage of the fast USB 3.0 interfaces: You directly connect peripheral equipment such as handheld scanners to your PC scale without an extra power supply unit.

A software that flexibly covers all retail tasks, quickly networks your device with the back office and simply grows with your requirements. This is our response: an open and modular software architecture.

What applies to your hardware also holds true for your software: Combine software modules to your individual solution. Dock RetailApps in a simple and cost-effective manner. Remain open for 3rd-party hardware or software. Whatever digital solution you will design: With our 360° retail software you will benefit from a networked work and data flow. From the service counter up to the back office.

360°
retail software

Discover your efficient tool by means of which you centrally control retail processes, manage and analyze them. The ideal basis in order to optimize your processes.

Management software

Management software RetailControl

Control your scales and price labelers with RetailControl —in a network or individually. Reduce your administrative effort and network your devices with the back office. With the monitoring software you get the same data versions on all devices at the touch of a button. Updates and modifications are targeted and happen automatically. Without on-site visits and long downtimes. No more delays during selling. Benefit from reliable, transparent and efficient processes. In terms of configuration, program version and operating procedure of your hardware.

Data management software RetailOffice

This software is your efficient tool to centrally manage and expand your master data for scales and cash registers. Even calling up and evaluating your sales from the back office becomes possible. Control your entire store system in a flexible manner with minimal time effort. From the current article price at the cash register up to new advertising on the operator displays of your scales. The perfect solution for retailers and large chain stores.

Interface software RetailConnect

RetailConnect converts data from different sources. The integrated communication driver ensures a smooth data transfer between your back office and the terminal equipment. Central and flexible data transfer—easy, fast and safe. Complete transfer of sales data to your host system for evaluation. The bilateral software makes it possible. Start the transfer time-controlled, via trigger file or remotely. Install updates outside business hours. Price changes can be centrally rolled out on your terminal equipment. Even image files are reliably transferred via SFTP.

Device software

RetailApps

RetailApps combine individuality with the advantages of standard software. They are separate, self-contained solutions which can be easily docked on to the scale software RetailPowerScale via interface. Of modular design, readily available, at an attractive price—you remain flexible for any new requirement. RetailApps are available in four central categories. Our international development team dynamically expands the range: We initiate new developments and updates and are open for your wishes.

Basic software RetailIntegratorsKit (RIK)

With RIK your device is ready for new integrations. The standard version already includes metrologically approved components. You receive a completely run-capable and proven scale solution. The basic software provides all functions which you need to configure, calibrate or test your hardware—scales, printers, displays etc. Remain flexible in the long term with our powerful and open platform. Smoothly integrate, for example, 3rd-party software in your Bizerba scale.

PC scale software RetailPowerScale

RetailPowerScale is the key that turns your device into an all-in-one solution. Of modular design it combines standard with individuality. Utilize the PC scale software whether you are using a Linux or Windows operating system. Expand and configure the software to match your needs. Whether you are a food specialist retailer or a global retailer. Also remain flexible in terms of the use of your equipment. RetailPowerScale works independent of the platform. Easy to integrate and maintain it runs on any PC scale, tablet or wrapper.

RetailApps

Flexibly expand the functions of the PC scale software RetailPowerScale with Bizerba RetailApps. Simple, fast and cost-effective. The modular software architecture makes it possible. RetailApps are available in four central categories.

Data management
RetailApps managing process-related data.

Administration
Ideal solutions simplifying administrative tasks or processes.

Communication
RetailApps communicating in both directions: between device and customer, between device and operator.

Money
Functions managing price information and sales.

A selection of matching RetailApps can be found here.

RetailApp PowerQueue
Making optimum use of waiting times: Manage waiting times and queues at the fresh food counter. Allow your customers to optimally use their shopping time. Via RetailApp you define queuing departments. Your printer automatically provides you with queuing numbers which can be digitally displayed for your customers.

RetailApp PaperNearEnd
No more end of paper: Avoid empty label rolls on your scales, particularly in the unattended self-service area. An early warning system signalizes when a scale's label roll is almost empty. Different notification types are possible: via e-mail, in the central monitoring or via USB lamp.

RetailApp SnackBar
Actively increase sales: In a few steps the RetailApp allows you to link product suggestions to items and increase sales. The product suggestions defined and registered for the item are automatically shown to your staff on the operator display. Ideally suitable to actively take care of and advise customers.

RetailApp LasVegas
Customer conversation during shopping: The RetailApp is your perfect tool for promotional campaigns and an increased shopping experience. When closing a label or receipt, a slot machine starts on the customer display. Three matching symbols mean jackpot—that's LasVegas. Prize and winning frequency are defined by you.

RetailApp IngredientManager
Transparent product information: Stay on top of things via RetailApp and make your customers feel good for being well informed about allergens and ingredients. The IngredientManager RetailApp consists of two license modules: AllergenManager and IngredientFinder. You may use them either individually or in combination.

RetailApp TraceListing
Flexible origin data management: Maintain origin data of your items directly on the scale in an easy, fast and safe manner via RetailApp. Step by step and individual—whether manual input, scanning, predefined lists or the input of dates via the calendar element.

RetailApp EasyTracing
Easy management of data of origin: Link one or more lot numbers to an item. Digitally maintain data via your host system or via scan directly on the scale. Existing lot numbers for a sales article are registered automatically. Should there be several lot numbers, select the corresponding number from a selection list.

RetailApp EasyOrder
Managing a customer order without paper: Manage customer requests via EasyOrder directly on the scale—from recording and preparation up to closing a ticket at pick-up. Enter order changes via the system in a convenient way. When the merchandise is picked up you open a sales ticket. This allows your customer to purchase further items.

RetailApp ShelfTag
Correct labeling of articles from the fresh food counter: Print shelf tags directly on the scale and up to date. The RetailApp automatically recognizes relevant PLU data changes. With a single press of a button you print the latest article information. Select your tag from customizable PDF templates.

RetailApp TimedAction
Perfect timing on the PC scale: With the RetailApp, time-controlled messages are shown on the scale or campaigns carried out. Ideally suitable for optimized operating processes. Shut down your scales in a controlled manner at the end of a work day or automatically remind your operating staff to check displayed merchandise on a regular basis.

RetailApp PaymentManager
Easy integration of payment systems: This RetailApp offers four license modules. Integrate, for example, ElectronicCash EC terminals in your selling process and process payment transactions in an easy and transparent manner. CashManagement automatically returns the change amount in bills and coins. Your benefit: hygienic operating processes without direct contact with cash.

XC II 800 Pro

Perfect counter scale for the modern fresh food counter. Ideally suitable for assisted sales, self-service, price labeling and as a compact checkout solution.

Highlights

- High-end PC scale with a powerful Intel® Quad Core processor: More performance for optimized graphics while consuming minimum energy
- Large RAM: Ideally suitable for new features and requirements
- Current Windows and Linux operating system: 64 bit
- SuperSpeed interfaces: 2 x USB 3.0
- Unique 3-in-1 printer: Receipt, label or linerless mode
- Easy Load: Easy to change label rolls
- Easy Clean: Easy and fast cleaning
- Fanless housing: Optimized hygiene and energy efficiency:
- Wake on LAN: Increased energy efficiency

Options

- Variable weighing ranges
- Easy Level tilt compensation: Improved accuracy of the weight value in spite of an angled position of the scale, avoids loss os sales.
- COM interface for cash register drawer
- Different display sizes
- WI-FI
